

CARPET BEETLE TREATMENT

CLIENT PREPARATION FORM

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the necessary preparations listed below. The following steps will ensure that your Technician is able to provide an effective and safe treatment.

HOW TO PREPARE FOR THE SERVICE

LIVING ROOM, BEDROOMS, CLOSET, ETC

- Vacuum all rugs, carpet, and upholstered furniture. Vacuum bag should be discarded immediately upon completion.
- Any unlaundered wool, or natural fibre clothing should be laundered or at least placed in a hot dryer for one hour. (Follow all label recommendations before laundering)
- Move all furniture 12" (30 cm) away from the walls (Please be sure to exercise safety first and do not attempt to move very large furniture)

HOW TO HELP US FURTHER

- Try to keep a LIVE sample of the pest in a sealed zip-lock bag or container for the technician to identify. Also be sure to take note of ALL the areas of concern.

WHAT YOU CAN EXPECT FROM THE TREATMENT

Your Technician will use a variety of methods to control the pest depending on each unique situation. The majority of the treatment will focus on the room's baseboards and flooring where activity was detected. All treatments will be made with your safety in mind to ensure your health.

AFTER THE TREATMENT

The treatment will remain effective only if the following steps are taken after your home is serviced:

- Avoid waxing or washing floor surfaces, especially the edges for at least 3 weeks after treatment, and do not steam clean carpets. Vacuum as usual.
- DO NOT use other pest control chemicals (powders or sprays) or cleaning products anywhere near spray treatments, as this will decrease effectiveness.
- Vacuum appropriately.

REMINDER

It is necessary for you and your pets to leave your home for 4 hours once the treatment begins.

Fish aquariums maybe left onsite, however they should be covered and air filters must be disconnected. Persons with underlying health conditions should consult their family physician where they have concerns regarding re-entry time. Upon re-entry, please open windows for 20 min to properly ventilate the treated rooms.

Your Technician...

- Provincially Licensed
- Receives on-going training in their branches and at Abell University on-line
- Audited regularly by the industry's most recognized Quality Assurance Team
- Fully Insured
- Follows Quality Pro standards
