

PHARAOH ANT TREATMENT CLIENT PREPARATION FORM

In order for our company to provide the most effective service possible, we ask that before our arrival you review and complete all the necessary preparations listed below. The following steps will ensure that your Technician is able to provide an effective and safe treatment.

HOW TO PREPARE FOR THE SERVICE (in your kitchen & areas of activity)

- Empty the cupboards, drawers & closets that are experiencing the pest issue or signs of activity
- Keep all removed items within the kitchen area, i.e. on kitchen table to prevent the Pharaoh Ants from spreading to other locations.
- Ensure that there are no potential food or water sources available which could attract the Pharaoh Ants
- Ensure all exposed food is placed in tightly sealed containers
- Clean up any food spills and/or garbage

AREAS TO BE MADE ACCESSIBLE:

Bathrooms, heating registers, electrical conduits.

WHAT YOU CAN EXPECT FROM THE TREATMENT

Your Technician will be using a bait formulation and bait stations that are strategically placed at sites of Pharaoh Ant activity. This is the safest, most effective and efficient means of pharaoh ant control. The bait is long lasting, however multiple visits are typically required to re-inspect and replace bait until the infestation is eliminated. It is imperative to let us know if you are still experiencing problems after 3 weeks of the initial treatment. All treatments will be made with your safety in mind to ensure your health.

AFTER THE TREATMENT

The bait will remain effective only if the following steps are taken after your home is serviced:

- DO NOT use other pest control chemicals (powders or sprays) or cleaning products anywhere near bait placements, as this will decrease or eliminate the effectiveness of the bait(s).
- Remove all competing food sources (this means keeping all foods in tightly sealed containers, cleaning up spills as they occur, removing trash on a regular basis, etc.)
- The bait stations must be left where the Technician has placed them.
- DO NOT use off the shelf chemicals; this can actually make the situation worse.

ALLERGEN NOTIFICATION

Some of the products we utilize for controlling Pharaoh Ants contain allergens such as peanut butter and shellfish. Please alert your Technician and/or Superintendent where concerns over allergens exist prior to the treatment.

REMINDER

It is not necessary for you or your pets to leave your home before, during or after the treatment.

Please be patient, the BAITS will reduce PHARAOH ANT infestations to very low levels within approximately 3 to 4 weeks.

Your Technician...

- Provincially Licensed
- Receives on-going training in their branches and at Abell University on-line
- Audited regularly by the industry's most recognized Quality Assurance Team
- Fully Insured
- Follows Quality Pro standards
